

A Lead (Pb)

B Cadmium (Cd)

C Total arsenic (As)

Squares: study geometric means (size ∝ weight); lines: 95% CI (hidden where narrower than the square).  
Diamond: pooled geometric mean with Hartung–Knapp–Sidik–Jonkman 95% CI. Blue bar: 95% prediction interval.  
Log-normal moments derived from the reported arithmetic mean and SD (Higgins et al., 2008).  
Country codes: CN China, TR Türkiye, KR Republic of Korea. Mean ± SD in µg/kg wet weight.
